

Descriptive Wireframe Document - Lab 7 Example

Use the following structure as a companion to your wireframe to describe all of its major components. Create and label as many items as you feel is appropriate for your wireframe. You should be able to hand your wireframe and this descriptive document over to another person and fully communicate your vision for your page.

Rationale: What are the major issues with the existing page and why have you chosen to modify them? Use the concepts we've learned so far such as Colour Theory, C.R.A.P. design theory, and Accessibility (font, alt tags, contrast, etc) to inform your rationale. Your rationale should be about 250 words.
